Volume 15
1976

Number One

Systems Network Architecture: An overview 4
J. H. McFadyen

The transmission subsystem in Systems Network Architecture 24
P. G. Cullum

The role of the Network Control Program in Systems Network Architecture 39
W. S. Hobgood

The Virtual Telecommunications Access Method: A Systems Network Architecture perspective 53
H. R. Albrecht and K. D. Ryder

LABS/7—a distributed real-time operating system 81
D. L. Raimondi, H. M. Gladney, G. Hochweller, R. W. Martin, and L. L. Spencer

Penetrating an operating system: a study of VM/370 integrity 102
C. R. Attanasio, P. W. Markstein, and R. J. Phillips

Number Two

Experiments in line quality monitoring 124
P. Bryant, F. W. Giesin, Jr., and R. M. Hayes

HIPO and integrated program design 143
J. F. Stay

Top-down development using a program design language 155
P. Van Leer

Number Three

Design and code inspections to reduce errors in program development 182
M. E. Fagan

Composite design facilities of six programming languages 212
G. J. Myers

A model of large program development 225
L. A. Belady and M. M. Lehman

Number Four

The Peterlee Relational Test Vehicle—a system overview 285
S. J. P. Todd

Interactive modeling of computer systems 309
M. Reiser

Service levels: A concept for the user and the computer center 328
L. J. Lewis

An APL emulator on System/370 358
A. Hassitt and L. E. Lyon
